

IECEx Certificate of Conformity

INTERNATIONAL ELECTROTECHNICAL COMMISSION IEC Certification Scheme for Explosive Atmospheres

for rules and details of the IECEx Scheme visit www.iecex.com

Certificate No.:	IECEx BAS 07.0038	issue No.:0	Certificate history:
Status:	Current		
Date of Issue:	2007-09-06	Page 1 of 3	
Applicant:	Federal Signal Corporation Federal Signal Corporation 2645 Federal Signal Drive University Park Illinois 60466-3195 United States of America		
Electrical Apparatus: Optional accessory:	Series 2000 Beacon		
Type of Protection:	Exd ExtD Exde		
Marking:	Ex d IIB T4 ExtD A21 IP66 T135°C (- 40°C ≤ ta ≤ + 70°C) with Xenon or Fluorescent lamps fitted or Ex de IIB T4 ExtD A21 IP66 T135°C (- 40°C ≤ ta ≤ + 70°C) when additionally fitted with an increased safety terminal box or Ex d IIB T6 ExtD A21 IP66 T85°C (- 40°C ≤ ta ≤ + 55°C) with LED lamps fitted or Ex de IIB T6 ExtD A21 IP66 T85°C (- 40°C ≤ ta ≤ + 55°C) when additionally fitted with an increased safety terminal box.		
Approved for issue on behalf of the IECEx Certification Body:	 R S Sinclair		
Position:	Managing Director		
Signature: (for printed version)	 M. D. BOWNEY		
Date:	6/9/07

IECEx Certificate of Conformity

Certificate No.: IECEx BAS 07.0038

Date of Issue: 2007-09-06

Issue No.: 0

Page 2 of 3

Manufacturer: **Federal Signal Corporation**
2645 Federal Signal Drive
University Park
Illinois
60466-3195
United States of America

Manufacturing location(s):

This certificate is issued as verification that a sample(s), representative of production, was assessed and tested and found to comply with the IEC Standard list below and that the manufacturer's quality system, relating to the Ex products covered by this certificate, was assessed and found to comply with the IECEx Quality system requirements. This certificate is granted subject to the conditions as set out in IECEx Scheme Rules, IECEx 02 and Operational Documents as amended.

STANDARDS:

The electrical apparatus and any acceptable variations to it specified in the schedule of this certificate and the identified documents, was found to comply with the following standards:

IEC 60079-0 : 2004 Edition: 4.0	Electrical apparatus for explosive gas atmospheres - Part 0: General requirements
IEC 60079-1 : 2003 Edition: 5	Electrical apparatus for explosive gas atmospheres - Part 1: Flameproof enclosure 'd'
IEC 60079-7 : 2006-07 Edition: 4	Explosive atmospheres - Part 7: Equipment protection by increased safety "e"
IEC 61241-0 : 2004 Edition: 1	Electrical apparatus for use in the presence of combustible dust - Part 0: General requirements
IEC 61241-1 : 2004 Edition: 1	Electrical apparatus for use in the presence of combustible dust - Part 1: Protection by enclosures "tD"

This Certificate does not indicate compliance with electrical safety and performance requirements other than those expressly included in the Standards listed above.

TEST & ASSESSMENT REPORTS:

A sample(s) of the equipment listed has successfully met the examination and test requirements as recorded in

Test Report:

GB/BAS/ExTR07.0081/00

Quality Assessment Report:

US/UL/QAR06.0012/00

Schedule

EQUIPMENT:

Equipment and systems covered by this certificate are as follows:

The 2000 Series Beacon is rated at up to 240V a.c. and comprises a base and cover from aluminium alloy. The cover is provided with a cemented wellglass, the cover is secured to the base via four grade A2-70 stainless steel screws.

The beacon may be provided with up to four Xenon Lamps up to a maximum power of 60VA which flash at a maximum rate of 95 flashes a minute, or up to four florescent lamps up to a maximum power of 36W, or light emitting diodes (LEDs) rated at up to 9W; in this form the unit is Exd.

Alternatively the base can be drilled and the holes fitted with line bushings terminated within an increased safety terminal box attached to the side of the beacon which also contains increased safety terminals; in this form the unit is Exde.

To obviate the risk from internal hotspots associated with the 2000 Series Beacon the enclosure must not be opened even when isolated, when a flammable atmosphere is present. A label stating this information is fitted externally to each and every enclosure.

Cable entry holes are provided as specified on the certified drawings for the accommodation of flameproof cable entry devices, with or without the interposition of a flameproof thread adapter. Unused entries are to be fitted with certified flameproof stopping plugs.

The cable entry devices, thread adapters and stopping plugs shall be suitable for the equipment, the cable and the conditions of use and shall be certified as Equipment (not a Component).

Internal and external earthing facilities are provided.

CONDITIONS OF CERTIFICATION: NO
